🏆 RANKINGS NHANH

Top 5 tổng thể (feature breadth): Wallet BudgetBakers (33) > Lunch Money/Actual Budget (31) > Spendee/Toshl/Buxfer/Hurdlr (30)

Top 3 cho Solopreneur ICP (P+B + tax): Hurdlr ★★★★★ → Found ★★★★★ → Toshl 🟡 (mọi app khác = ❌)

Top 3 cho Shared Finance ICP (couples/families): Spendee ★ → Goodbudget ★ → HomeBudget ✅ → Wallet 🟡

PHẦN 2 — APP FEATURE SUMMARY CARDS

Full cards (8-12KB mỗi card) trong cards/. Tóm tắt 1 dòng + 3 signature features + similarity score.

TIER 1 — DIRECT HEAD-TO-HEAD COMPETITORS

1 Money Lover — Multi-currency tracker SE Asia, Linked Wallet bank sync

- 💰 Free / Premium \$19.99 lifetime | 👥 10M+ | ★ 4.6 | 🌐 Global (SEA mạnh)
- **Signature:** (1) Linked Wallet bank sync 8+ SEA countries, (2) Multi-Wallet management Premium, (3) Goal Wallets motivational
- **Gaps:** Không OCR, không split tx, không API
- **Similarity to MMW:** ★★★★★☆☆ (3/5)
- **Steal:** Goal wallets framing | **Avoid:** Thiếu OCR là pain point lớn

2 Spendee — *Social-first tracker với shared wallets + AI receipt scanner*

- 💰 Free / Plus \$1.99 / Premium \$5.99 / Lifetime \$119.99 | 👤 3M+ | ⭐ 4.6 | 🌐 Global (EU mạnh)
- **Signature:** (1) ⭐ AI Receipt Scanner (3-5s), (2) ⭐ Shared Wallets (transparent “ai chi bao nhiêu”), (3) Bank Connect 2,500+ providers
- **Gaps:** Không recurring expense setup, không net worth, không API/Zapier
- **Similarity to MMW:** ⭐⭐⭐⭐☆ (4/5) — *highest match cho shared finance ICP*
- **Steal:** Shared wallets UX + AI receipt scanner | **Avoid:** Bill/subscription tracking yếu

3 Toshi Finance — *200+ currencies leader + River Flow analytics*

- 💰 Free / Pro \$2.99 / Medici \$4.99 | 👤 3M+ | ⭐ 4.7 | 🌐 Global
- **Signature:** (1) ⭐ River Flow visualization (cash flow as river), (2) ⭐ 200+ curr + 30 crypto + historical rates back to 1999, (3) ⭐ Flexible recurring (custom intervals: bi-weekly, “stop after 10 times”)
- **Gaps:** Không OCR, không collaboration, không crypto wallet auto-track
- **Similarity to MMW:** ⭐⭐⭐☆☆ (3/5)
- **Steal:** River Flow metaphor cho Telegram + flexible recurring | **Avoid:** Single-user model

4 Wallet by BudgetBakers — *EU bank sync leader + family sharing*

- 💰 From €4.99/mo | 👤 ~500K | ⭐ 4.5 | 🌐 EU (50+ langs), APAC, Americas
- **Signature:** (1) ⭐ SaltEdge sync 15K banks (5K EU PSD2), (2) ⭐ ML auto-cat + rule editor + sub-categories, (3) ⭐ Rollover budgets + sub-budgets
- **Gaps:** Không mobile OCR, FX rates overnight (không real-time), không net worth
- **Similarity to MMW:** ⭐⭐⭐☆☆ (3/5)
- **Steal:** SaltEdge sync (cho EU TAM), family permissions framework | **Avoid:** Overnight FX, no mobile OCR

5 Lunch Money — *Indie + open API + crypto-native*

- 💰 Free / \$14.99/mo | 👤 ~100K | ⭐ 4.5+ | 🌐 Global (US-focus)
- **Signature:** (1) ⭐ Open API v2 + Zapier 8K apps, (2) ⭐ Recurring detection ML + calendar view, (3) ⭐ Net worth + crypto portfolio
- **Gaps:** Không family sharing, không investment beyond crypto, không tax export
- **Similarity to MMW:** ⭐⭐⭐⭐☆ (3.5/5)
- **Steal:** Open API early = developer moat (CPA plugins) | **Avoid:** Indie = no collaboration ceiling

6 Money Manager (Realbyte) — *Android-dominant 20M downloads, double-entry accounting*

- 💰 Free / \$2.49/mo cloud sync | 👤 20M+ downloads | ⭐ 4.64 (And), 4.81 (iOS) | 🌐 Global (Android-first, Korean dev)

- **Signature:** (1) ★ Double-entry accounting (rare in consumer), (2) Asset+liability tracking (loans, insurance, real estate), (3) Subcategory budgets visual
 - **Gaps:** Không bank sync (manual only), không family sharing, không crypto/investment
 - **Similarity to MMW:** ★★☆☆☆ (2.5/5)
 - **Steal:** Manual entry can scale to 20M (proof: telegram text entry beats form) | **Avoid:** Double-entry niche
-

TIER 2 — ADJACENT COMPETITORS

7 1Money — *Minimal one-tap entry tracker*

- 💰 \$7.99/mo | 👤 Moderate | ★ 4.7 | 🌐 Global
- **Signature:** (1) One-tap transaction entry, (2) Cloud sync iOS/Android, (3) Crypto + precious metals tracking (top 100 crypto)
- **Gaps:** Không bank sync, không sharing, không business
- **Similarity to MMW:** ★★☆☆☆ (3/5)
- **Steal:** Speed-first capture UX | **Avoid:** Recent free→paid flip kills retention

8 HomeBudget with Sync — *Family-first multi-OS (5 platforms)*

- 💰 Free Lite (20 tx) / Pro per-OS purchase | 👤 Established | ★ 4.5 | 🌐 Global multi-platform
- **Signature:** (1) ✅ Family Sync OTA (WiFi/3G/4G real-time), (2) ★ 5 OSes parity (iOS/iPad/Android/Mac/Win), (3) Bills-due first-class workflow
- **Gaps:** Không bank sync, single-currency only, sync reliability issues reported
- **Similarity to MMW:** ★★☆☆☆ (2/5)
- **Steal:** Bills-due as separate workflow | **Avoid:** Per-OS pricing = adoption blocker

9 Fast Budget — *Android-native Italian app + debt tracking*

- 💰 Free + Premium [unverified] | 👤 ~100K Android | ★ 4.3 | 🌐 Global (Italian origin)
- **Signature:** (1) Debt/credit tracking first-class, (2) Calendar view forward-look (scheduled tx), (3) Subscription manager + Dropbox auto-backup
- **Gaps:** Bank sync Italian-focused only, không collaboration, web app minimal
- **Similarity to MMW:** ★★☆☆☆ (2/5)
- **Steal:** Debt as separate workflow + calendar cash flow | **Avoid:** Android-first, iOS afterthought

10 Buxfer — *Bank aggregation powerhouse 20K banks + 110 countries*

- 💰 \$9.99-\$24.99/mo (PLUS/PRO/PRIME) | 👤 150K+ | ★ 4.2 | 🌐 110 countries
- **Signature:** (1) ★ 20K+ banks 110 countries, (2) Nested tags unlimited depth + rules, (3) Investment portfolio + retirement planner
- **Gaps:** Không AI/ML, support outage Jan 2025 (unresolved), web-first UX (mobile second-class)

- **Similarity to MMW:** ★★★★★☆☆ (3/5)
- **Steal:** Nested tags > flat categories (P&L control) | **Avoid:** Support outage = retention killer

1 1 Wally — *AI-first WallyGPT + privacy-conscious AI*

- 💰 Free / Gold \$1.99/mo or \$24.99/yr | 👤 “#1 Finance App 40+ times” | ★ 3.9 | 🌐 70 countries, 15K banks
 - **Signature:** (1) ★ WallyGPT chat-based advisor (LLM “brutally honest”), (2) Auto-categorization + merchant DB, (3) ★ Privacy-first AI (data destroyed 30 days, never trained)
 - **Gaps:** Không collaboration, AI hallucination concerns, multi-curr behind paywall (\$7.99)
 - **Similarity to MMW:** ★★★★★☆☆ (3.5/5)
 - **Steal:** Privacy-first AI policy resonates vs ChatGPT concerns | **Avoid:** Multi-curr paywall
-

TIER 3 — SOLOPRENEUR-LEANING

1 2 Hudlr — *Gig/freelancer GPS mileage + tax tracker*

- 💰 Free / \$9.99/mo Premium / \$200/yr Pro | ★ 4.3-4.7 | 🌐 US (iOS/Android)
- **Signature:** (1) ★ GPS automatic mileage (swipe Business/Personal), (2) ★ Real-time quarterly tax estimate + Schedule C export, (3) ★ Multi-platform revenue auto-sync (Stripe/Square/PayPal/Uber/Shopify/Airbnb)
- **Gaps:** Không multi-business, sync glitches reported (3.0 GMB), không household/family
- **Similarity to MMW:** ★★★★★☆☆ (5/5) — *closest competitor cho solopreneur ICP*
- **Steal:** Tax calendar engagement lever + multi-platform revenue sync | **Avoid:** Sync glitches

1 3 Found — *Banking + bookkeeping for self-employed (US-only)*

- 💰 Free Core / \$35/mo Plus / \$80/mo Pro | ★ N/A new | 🌐 US-only
- **Signature:** (1) ★ Unified business bank account + auto-categorized bookkeeping, (2) ★ Auto tax withholding + Taxes Pocket, (3) ★ Schedule C auto-generation + in-app federal tax payment
- **Gaps:** US-only, business-only (no personal), no multi-business, closed integrations (no API)
- **Similarity to MMW:** ★★★★★☆☆ (4.5/5)
- **Steal:** Taxes Pocket pattern (auto set-aside %) + invoice generation | **Avoid:** Owning bank account (out of scope cho Telegram bot)

1 4 Goodbudget — *Envelope budgeting pioneer + couples sync*

- 💰 Free (10 envelopes) / \$10/mo Premium | ★ 4.5+ | 🌐 Global iOS/Android/Web
- **Signature:** (1) ★ Digital envelope system (zero-based budgeting), (2) Hybrid bank sync + manual Match feature (Premium), (3) ★ Multi-user household sync (5 devices, real-time)
- **Gaps:** Zero business features, no income tracking, limited reports
- **Similarity to MMW:** ★☆☆☆☆ (1.5/5) — *misaligned ICP*

- **Steal:** Match feature (manual + auto-import dedup) | **Avoid:** Envelope methodology không fit solopreneur

15 **Actual Budget** — *Open-source self-hosted privacy-first*

- 💰 100% Free OSS + \$1.50/mo SimpleFIN optional | ⭐ 4.7+ | 🌐 Global
- **Signature:** (1) ⭐ E2EE optional + local-first, (2) ⭐ 100% open source MIT + self-host (Docker/Railway), (3) ⭐ Zero-based budgeting YNAB-compatible + Sankey viz
- **Gaps:** Zero business features, no collaboration (privacy by design), bank tokens stored plaintext server-side
- **Similarity to MMW:** ⭐⭐☆☆☆☆ (2/5)
- **Steal:** Transparent privacy stance (“we see tx but never sell”) | **Avoid:** Open-source = solopreneurs không quan tâm; “privacy” < “tax readiness”

PHẦN 3 — FEATURE CATEGORY ANALYSIS

Cho mỗi category: Best in class → Top 5 → Trends → MMW recommendation

CATEGORY 1: TRANSACTION CAPTURE

🏆 **BEST IN CLASS: Found** (auto-capture at source — debit card swipe = instant ledger, zero sync delay)

🇺🇸 **TOP 5:** 1. **Found** ⭐⭐ — bank-first (own account = perfect data source) 2. **Hurdlr** ⭐ — GPS mileage + 9,500 banks + Stripe/Square/PayPal direct 3. **Buxfer** ⭐ — 20K+ banks, 110 countries 4. **Wallet BudgetBakers** ⭐ — SaltEdge 15K banks (PSD2 EU) 5. **Spendee** ⭐ — 2,500 providers + AI receipt scanner

💡 **KEY TRENDS:** - **Bank sync = table stakes ở phương Tây**, nhưng manual entry vẫn scale 20M+ users (Money Manager) ở developing markets - **AI Receipt OCR** chỉ Spendee + Wally làm tốt; phần lớn còn manual photo attach - **Direct payment processor integration** (Stripe/Square/PayPal/Shopify) đang vượt generic bank sync về real-time + revenue tracking - **Voice/SMS/Email parse** = vùng trắng (chưa app nào làm tốt)

🎯 **RECOMMENDATION CHO MMW: P0** - Skip Plaid/SaltEdge generic bank sync ở MVP (cost + delay + complexity) - Direct integrate Stripe + PayPal + Wise (90% solopreneur income) qua OAuth - Telegram natural language parse (“spent \$50 on Uber”) = lower friction than form-filling - Receipt OCR via Tesseract + photo upload Telegram = Phase 2

CATEGORY 2: CATEGORIZATION

🏆 **BEST IN CLASS: Wallet BudgetBakers** (ML + sub-cats + custom rule editor) tied with **Hurdlr** (auto B/P tagging on every layer)

 **TOP 5:** 1. **Wallet BudgetBakers** ★ — ML auto + rule editor + sub-cats + bulk reclassify 2. **Hurdlr** ★ — auto B/P + ML rules + GPS swipe 3. **Lunch Money** ★ — split tx, tags, API rules 4. **Found** ★ — ML + tax-deductible auto-flag 5. **Money Manager** ★ — sub-categories + visual icons (manual only) 6. **Goodbudget** ★ — AI envelope suggestions

💡 **TRENDS:** - **Auto-categorization với ML** = expected (Wally, Wallet, Hurdlr, Lunch Money) - **Split transactions** (1 tx → multiple categories) — chỉ Lunch Money + Actual làm; rare - **Tags hierarchical (nested)** — Buxfer unique (unlimited depth) - **Rule editor advanced** (AND/OR/regex) — Wallet best, Lunch Money via API

🎯 **RECOMMENDATION CHO MMW: P0** - Default 30 categories + custom unlimited - Auto-categorize via merchant DB lookup (free, no ML cost) - **B/P auto-tag based on income source** (Stripe = business, manual = ask) — must-have differentiator - Split tx support cho receipts mixed B/P

CATEGORY 3: REPORTS & ANALYTICS

🏆 **BEST IN CLASS: Toshl Finance** (River Flow signature visualization) tied with **Hurdlr** (P&L + Tax Deductions Report + Schedule C ready)

 **TOP 5:** 1. **Toshl** ★ — River Flow + 200+ curr historical + location analytics 2. **Hurdlr** ★ — Tax-ready P&L + mileage audit trail 3. **Found** ★ — Auto P&L + Income Statement + Schedule C 4. **Lunch Money** ★ — Calendar view + drill-down + crypto net worth 5. **Actual Budget** ★ — Sankey + Net worth + custom plugins (2026 roadmap)

💡 **TRENDS:** - **Visual storytelling** (Sankey, River Flow) > raw numbers — emotional clarity - **Tax-specific reports** (Schedule C, quarterly) chỉ Hurdlr + Found - **AI insights** (“you spent more on X”) = Wally only via WallyGPT - **Cash flow forecast** = vùng trắng (chưa app nào làm tốt for personal)

🎯 **RECOMMENDATION CHO MMW: P0 + P1** - P0: Monthly P&L per B/P split (income, expense, profit) - P0: Quarterly tax estimate report (US Schedule C-ready) - P1: River Flow-inspired Telegram message (“Your money: +\$2K → -\$1.2K rent → -\$300 food → +\$500 left”) - P2: Sankey/visual on web dashboard

CATEGORY 4: BUDGETING

🏆 **BEST IN CLASS: Goodbudget + Actual Budget** (zero-based envelope, the methodology leaders) tied with **Toshl** (flexible custom periods bi-weekly)

 **TOP 5:** 1. **Goodbudget** ★ — envelope methodology pioneer + couple sync 2. **Actual Budget** ★ — YNAB-compatible + rollover + goals 3. **Toshl** ★ — flexible periods (bi-weekly, custom) + tag-filtered 4. **Wallet BudgetBakers** ★ — sub-budgets + rollover + alerts 5. **Money Manager** ★ — sub-category budgets visual

💡 **TRENDS:** - **Zero-based / envelope** dominant methodology cho household - **Rollover** = expected; **sub-budgets** = differentiator - **Goals + savings targets** integrated với budgeting - **Solopreneur**: budgeting LESS important than tax estimate + P&L (Hurdlr, Found chỉ 🟡)

🎯 **RECOMMENDATION CHO MMW: P1 (NOT P0)** - Solopreneur ICP không cần envelope budgeting; cần P&L + tax visibility - Skip envelope methodology entirely (Hurdlr/Found đã chứng minh) - Light budgeting: monthly category limit + alert at 80% — đủ - Don't compete với YNAB/Goodbudget on budgeting depth

CATEGORY 5: MULTI-CURRENCY

🏆 **BEST IN CLASS: Toshl Finance** (200+ currencies + 30 crypto + historical rates back to 1999)

📊 **TOP 5:** 1. **Toshl** ⭐ — 200+ curr + crypto + historical 2. **Wallet BudgetBakers** ⭐ — 100+ curr + manual override 3. **Lunch Money** ⭐ — 100+ curr + crypto-native net worth 4. **Buxfer** ✅ — 130 curr + auto daily conversion 5. **Spendee** ✅ — multi-curr designed for nomads + Ethereum wallet

💡 **TRENDS:** - **Crypto integration** (BTC/ETH/stablecoins) = Lunch Money, 1Money lead - **Historical rates** (back-dated tx) = Toshl unique - **Real-time FX vs overnight refresh** — Wallet BudgetBakers còn dùng overnight (frustrate users) - **Multi-curr behind paywall** (Wally \$7.99) = WTP signal

🎯 **RECOMMENDATION CHO MMW: P0** - 50+ currencies via OpenExchangeRates/Wise API (live rates) - Crypto support BTC/ETH/USDT từ MVP (Gen-Z nomad ICP) - Multi-curr free, paywall behind only on advanced features (auto-rebalance, etc.)

CATEGORY 6: MULTI-ACCOUNT

🏆 **BEST IN CLASS: Buxfer** (unlimited 110 countries) tied with **Wallet BudgetBakers** (unlimited + groups + reconcile + archive)

📊 **TOP 5:** 1. **Buxfer** ⭐ — unlimited + 110 countries + transfer detection 2. **Wallet BudgetBakers** ⭐ — unlimited + groups + reconcile 3. **Lunch Money** ⭐ — unlimited synced + manual + reconcile 4. **Money Manager** ⭐ — assets/liabilities/loans/insurance 5. **Hurdlr** ⭐ — multi-bank + Stripe/Square/PayPal centralized

💡 **TRENDS:** - **Account types** mở rộng: cash → bank → CC → crypto → loans → insurance → real estate - **Auto-detect transfers** giữa accounts (không count as expense) = expected - **Account groups** (organize by type) — chỉ vài app - **Archive** (hide nhưng giữ history) = retention pattern

🎯 **RECOMMENDATION CHO MMW: P1** - Unlimited accounts từ MVP (Hurdlr proves) - 6 account types: cash, bank, CC, crypto, loans, savings goal - Auto-detect transfers (Stripe → bank = transfer, not income) - Account groups + archive — Phase 2

CATEGORY 7: PERSONAL vs BUSINESS SPLIT 🔥

🏆 **BEST IN CLASS: Hurdlr** (auto B/P tag mileage + income + expense + Schedule C export)

📊 **TOP 5 (very limited field):** 1. **Hurdlr** ★ — full auto-tag every layer, GPS swipe, Schedule C 2. **Found** ★ — business-only design, auto tax categorize, Taxes Pocket 3. **Toshl** 🟡 — location-tagging proxy, no formal P/B 4. **Wallet BudgetBakers** 🟡 — [unverified expense tags for biz] 5. **Money Manager** 🟡 — workaround via insurance/loan accounts

💡 **TRENDS:** - **HUGE WHITE SPACE:** Chỉ 2/15 apps làm P+B split tốt - **Tax export** (quarterly, Schedule C, deductions) = Hurdlr + Found only - **Mileage tracking** (GPS) = Hurdlr signature; no consumer competitor - **Multi-business** = vùng trắng (Hurdlr + Found đều single-biz)

🎯 **RECOMMENDATION CHO MMW: P0 — KILLER DIFFERENTIATOR - B/P tag on every transaction** — manual + auto-rule - **Income source auto-tag:** Stripe/Square/Shopify income = business; manual = personal default - **Quarterly tax estimate** prominently surfaced (US/EU rates) - **Schedule C export** for US filers (PDF + CSV cho accountant) - **Multi-business** — Phase 2 differentiator vs Hurdlr (LLC + side hustle)

CATEGORY 8: COLLABORATION

🏆 **BEST IN CLASS: Spendee** (shared wallets transparent + invite-based)

📊 **TOP 5:** 1. **Spendee** ★ — shared wallets killer feature 2. **Goodbudget** ★ — couples sync 5 devices real-time 3. **HomeBudget** ✅ — Family Sync OTA 5 OSes 4. **Buxfer** ✅ — share with family/accountants + IOU splitting 5. **Wallet BudgetBakers** 🟡 — family sharing 4 members, view-only/edit permissions

❌ **Hurdlr, Found, Lunch Money, Actual Budget, Toshl, Wally, 1Money, Fast Budget, Money Manager = ZERO collaboration**

💡 **TRENDS:** - 9/15 apps có **ZERO collaboration** = unmet TAM - **Shared wallets** (Spendee model) > Family sharing (BudgetBakers model) cho users - **Permission granularity** (view-only, edit, admin) chỉ Wallet BudgetBakers - **Approval workflow / activity log** = vùng trắng - **Accountant access (read-only)** = vùng trắng

🎯 **RECOMMENDATION CHO MMW: P1 (NOT P0) - Solopreneur MVP = single-user only (theo Hurdlr/Found pattern) - Phase 2: Accountant access (read-only Schedule C + receipts) = differentiator - Phase 3 (chỉ nếu pivot): Couples mode hoặc shared wallets**

CATEGORY 9: NOTIFICATIONS

🏆 **BEST IN CLASS: Wally** (real-time + WallyGPT proactive insights)

 **TOP 5:** 1. **Wally**  — real-time sync + recurring bill reminders 2. **Spendee**  — budget alerts customizable + bill reminders + real-time 3. **Toshi**  — budget alerts + bill reminders Pro+ 4. **Money Lover**  — bill reminders + budget alerts 5. **Buxfer**  — bill reminders + budget alerts

 **TRENDS:** - **Real-time tx notification** = standard - **Daily/weekly/monthly digest** (email) = vùng trắng - **Unusual spending AI detection** = WallyGPT only - **Subscription renewal reminder** = Fast Budget unique - **Bill reminder** = trở thành expected

 **RECOMMENDATION CHO MMW: P0 (TELEGRAM ADVANTAGE)** - Telegram-native = inherent notification advantage (no push opt-in friction) - Daily recap message: “Today: +*X*earned, -*Y* spent, \$*Z* to taxes” - Weekly P&L summary message - Quarterly tax deadline alerts (US/EU calendar) - Unusual spending AI: P1 (cần ML training data)

CATEGORY 10: INTEGRATIONS

 **BEST IN CLASS: Lunch Money** (open API v2 + Zapier 8K apps + GitHub awesome-lunchmoney)

 **TOP 5:** 1. **Lunch Money**  — API + Zapier + webhook + community plugins 2. **Hurdlr**  — Stripe/Square/PayPal/Shopify/Airbnb/Uber/9.5K banks 3. **Spendee**  — bank + e-wallet + Coinbase 4. **Buxfer**  — statement upload only [no Zapier confirmed] 5. **Wallet/Toshi/Found/etc.**  — CSV/XLS only

 **TRENDS:** - **API as moat:** Lunch Money proves dev community = retention - **9/15 apps** chỉ có CSV/XLS (no Zapier, no API) = blind spot - **Direct payment processor sync** (Stripe/Square) = expansion of “bank sync” - **Google Sheets 2-way** = vùng trắng (no app làm tốt) - **Calendar sync** (bills as events) = vùng trắng

 **RECOMMENDATION CHO MMW: P0 + P1** - P0: Stripe + PayPal + Wise direct OAuth (top 3 solopreneur revenue sources) - P1: Public API (REST + webhook) — moat cho CPA/freelancer plugins - P1: Google Sheets 1-way export (free tier value) - P2: Zapier integration (developer ecosystem)

CATEGORY 11: PLATFORM & UX

 **BEST IN CLASS: Spendee + Wallet BudgetBakers + HomeBudget + Hurdlr + Found + Lunch Money + Actual Budget** (all )

 **TOP 5:** 1. **HomeBudget**  — 5 OSes parity (iOS/iPad/Android/Mac/Win) 2. **Wallet BudgetBakers**  — iOS/Android/Web + offline + 50+ langs 3. **Spendee**  — iOS/Android/Web + Editors' Choice 4. **Lunch Money**  — Web + iOS app + offline 5. **Actual Budget**  — iOS/Android/Web PWA + self-host desktop

 **TRENDS:** - **Web app** = expected (nhưng Money Manager còn không có) - **Offline-first** = niche but loyal (Money Manager, Actual) - **Dark mode** = standard - **Languages 5+** = standard cho global - **Apple Watch / Wear OS** = vùng trắng

🎯 **RECOMMENDATION CHO MMW: P0** - Telegram bot (primary) + Web dashboard (secondary view) — đủ cho MVP - Skip native iOS/Android apps (Telegram = both) - 5 languages: EN, ES, PT, FR, DE (cover 80% global market) - Dark mode trên web — Phase 2

CATEGORY 12: SECURITY & PRIVACY

🏆 **BEST IN CLASS: Actual Budget** (E2EE optional + open source + self-host) tied with **Wally** (ISO 27001 + E2EE + GDPR + privacy AI policy)

📊 **TOP 5:** 1. **Actual Budget** ★★ — E2EE + OSS + self-host 2. **Wally** ★ — ISO 27001 + E2EE connection + GDPR + AI privacy 3. **Wallet BudgetBakers** ★ — 2FA + biometric + PSD2 + GDPR 4. **Buxfer** ★ — 256-bit + PCI + SOC3 + daily audits 5. **Found** ★ — FDIC banking-grade + Lead Bank Member FDIC

💡 **TRENDS:** - **2FA + biometric** = expected (nhưng nhiều app không có TOTP) - **E2EE** = differentiator nhưng caveat (Actual: bank tokens plaintext) - **Self-host** = niche (Actual only) - **Privacy policy clarity** (“we never sell data”) matters more than encryption claims - **Compliance certs** (SOC2, ISO 27001, PCI) = enterprise B2B angle

🎯 **RECOMMENDATION CHO MMW: P0 (table stakes)** - 2FA TOTP + Telegram-native auth - Biometric web app (WebAuthn passkey) - GDPR compliant + clear privacy policy (“never sell, never train AI on your data”) - Don't claim E2EE if can't deliver fully (Actual lesson) - Compliance: SOC2 type 1 trong Year 1 (B2B accountant TAM)

PHẦN 4 — GAP ANALYSIS CHO MMW

Backlog priority cho MMW MVP + Phase 2. Mỗi feature: ai có sẵn → khó build → impact ICP solopreneur

#	Feature	Apps có	Difficulty	Impact ICP	Priority	Phase
1	Personal vs Business auto-tag (income source rule + manual)	Hurdlr ★, Found ★	Medium (rule engine)	★★★★★ Killer	P0	MVP
2	Quarterly tax estimate (US/EU rates)	Hurdlr, Found	Medium (tax tables)	★★★★★	P0	MVP
3	Stripe + PayPal + Wise direct OAuth	Hurdlr (Stripe/Sq/ PayPal)	Medium-High (OAuth flows)	★★★★★	P0	MVP
4	Multi-currency 50+ + crypto BTC/ ETH	Toshl ★, Spendee, Lunch Money	Low (XE/ OpenExchangeRates API)	★★★★★	P0	MVP

#	Feature	Apps có	Difficulty	Impact ICP	Priority	Phase
5	Telegram natural language parse ("spent \$50 on Uber")	None ★★★★★ Unique	Medium (NLP regex + LLM fallback)	★★★★★★	P0	MVP
6	Daily/weekly P&L recap message	None (Wally proactive partial)	Low (cron + template)	★★★★★	P0	MVP
7	Schedule C export PDF + CSV (US)	Hurdlr, Found	Low (template)	★★★★★ US	P0	MVP
8	Receipt photo + Tesseract OCR	Spendee, Wally	Medium (Tesseract + merchant DB)	★★★★★	P1	Phase 2
9	Recurring tx auto-detect (Netflix, Spotify)	Lunch Money ★, Toshl	Medium (pattern matching ML)	★★★★★	P1	Phase 2
10	Public API + webhook (CPA plugins)	Lunch Money ★	Medium-High (REST + auth + docs)	★★★★	P1	Phase 2
11	Mileage tracking (manual entry "logged 12 miles")	Hurdlr GPS	Low (manual entry)	★★★★ US	P1	Phase 2
12	Subscription detection + cancel reminders	Fast Budget partial	Medium (recurring rules + alerts)	★★★★	P1	Phase 2
13	Accountant read-only access (Schedule C view)	None — vùng trắng	Medium (RBAC + invite)	★★★★★	P1	Phase 2
14	Multi-business support (LLC + side hustle)	None — vùng trắng	High (workspace model)	★★★★	P2	Phase 3
15	Invoice generation (text-to-invoice via Telegram)	Found, Hurdlr	Medium (PDF + payment link)	★★★★	P2	Phase 3
16	Sankey/ River Flow visualization (web dashboard)	Toshl ★, Actual Budget	Medium (D3.js viz)	★★★	P2	Phase 3
17	Couples mode /	Spendee ★, Goodbudget	High (multi-user infra)	★★★ (different ICP)	P3 / Cut	Maybe

#	Feature	Apps có	Difficulty	Impact ICP	Priority	Phase
18	shared wallet Investment portfolio tracking (stocks, dividends)	Buxfer	Very high (price feeds + cost basis)	★ Out of scope	Cut	—
19	Envelope budgeting methodology	Goodbudget, Actual Budget	Medium	★ Wrong ICP	Cut	—
20	Self-hosted / open source	Actual Budget	Very high	★ Wrong ICP	Cut	—

🎯 PRIORITIZED ROADMAP TÓM TẮT

MVP (P0) — 7 features: P/B auto-tag • Quarterly tax estimate • Stripe/PayPal/Wise OAuth • 50+ multi-curr + crypto • Telegram NL parse • Daily/weekly recap • Schedule C export

Phase 2 (P1) — 6 features: Receipt OCR • Recurring detection • Public API • Mileage manual entry • Subscription cancel reminders • Accountant read-only access

Phase 3 (P2) — 3 features: Multi-business • Invoice generation • Sankey viz

CUT/MAYBE — 4 features: Couples mode (different ICP) • Investment tracking (out of scope) • Envelope budgeting (wrong ICP) • Self-host (wrong ICP)

💎 4 KILLER COMBINATIONS (chỉ MMW có)

1. **Telegram NL parse + B/P auto-tag + Quarterly tax** = “spent \$50 on Uber” → Bot reply: “Logged: \$50 transport (Personal). Q2 tax estimate: \$1,240 (no change)”
2. **Stripe webhook + Schedule C export** = real-time business revenue capture, zero sync delay (beat Hurdlr’s 3-5 day Plaid lag)
3. **Daily P&L recap in Telegram** = retention loop without push notification opt-in (Telegram = always reachable)
4. **Accountant read-only access** = B2B viral channel (CPA invites client → client signs up to grant access)

⚠️ KHÔNG NÊN (lessons từ research)

- **Don’t compete với YNAB/Goodbudget on envelope budgeting** — wrong ICP
- **Don’t claim E2EE** unless deliver fully (Actual Budget plaintext bank tokens lesson)
- **Don’t add couples mode at MVP** — Hurdlr/Found chứng minh single-user solopreneur scale tốt
- **Don’t pursue investment tracking** — Buxfer/Lunch Money chứng minh expansion là mess

- **Don't bloat categories** — Money Lover/Money Manager 25-100 default categories = decision fatigue
-

? UNRESOLVED QUESTIONS

1. **Hurdlr's Plaid cost** — chưa verify per-user fee Hurdlr trả Plaid (\$0.10-0.30/MAU est.); MMW phải tính tương tự nếu chọn Plaid
 2. **Found's accountant access** — docs imply có nhưng không explicit feature page; cần test trực tiếp
 3. **Lunch Money API v2 GA date** — alpha → GA "Q1 2026" — chưa confirm released
 4. **Spendee Premium accuracy** — AI receipt scanner accuracy metrics chưa public
 5. **Money Lover P+B [unverified]** — có tag personal/business hay không? Cần test
 6. **Wally pricing model** — free + Gold \$1.99 vs trước \$7.99 multi-curr in-app purchase — confusing, cần verify current
 7. **Buxfer support recovery** — Jan 2025 outage có resolved chưa as of May 2026?
 8. **Actual Budget plugins ecosystem** — 2026 roadmap claim "plugins ready" nhưng GitHub 0 plugins live
 9. **Stripe/Square real-time API quality** — Hurdlr có specific issues với sync; MMW cần verify trước khi commit
 10. **Toshl recurring custom intervals UI** — "stop after 10 times" chỉ documented in blog post; cần verify UI hiện tại
